

IRAJ SHAHZAD

Full Stack Web Developer

Islamabad, Pakistan | +92 314 599 9894 | irajshhzad@gmail.com

SUMMARY

Computer Science graduate and Full Stack Web Developer with two years of hands-on project experience and a three-month industry internship. Skilled in the MERN stack (MongoDB, Express, React, Node.js) and Next.js, with a strong understanding of responsive UI design. Built Memory Care, a solo final year project delivering an AI-powered care and wellness platform, gaining practical experience integrating facial recognition and an NLP-based chatbot into a full-stack application.

SKILLS

Languages: JavaScript, Python, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

AI / ML: Python, Keras, NLTK, face-api.js (Facial Recognition), Chatbot / NLP

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman, Netlify, Vercel, Heroku

Soft Skills: Problem-Solving, Debugging, Teamwork, Project Management, Communication

PROFESSIONAL EXPERIENCE

Web Development Intern - Devzz Tech Solutions

Jun 2025 – Aug 2025

Islamabad - Full Stack Development Intern

- Worked on multiple full-stack development tasks, contributing to front-end and back-end modules.
- Gained hands-on experience with ERP software, improving workflows and data handling.
- Collaborated with development and communication teams to plan and execute tasks.
- Enhanced problem-solving, teamwork, and scalable web application development skills.

PROJECTS

Memory Care - AI-Powered Care & Wellness Platform

Final Year Project

Tech stack: Next.js, React, Node.js, Express, MongoDB, Socket.io, face-api.js, Python (Keras, NLTK), JWT

- Built a full-stack care-coordination platform with dedicated patient, caregiver, and admin dashboards for medication reminders, routine tracking, and compliance reporting.
- Implemented a real-time SOS alert system with Socket.io that routes emergency notifications directly to assigned caregivers.
- Developed a facial recognition module using face-api.js, applying 5-frame averaged descriptors and tuned detection thresholds to improve recognition accuracy.
- Designed and trained a bilingual AI chatbot (Python, Keras, NLTK) for English/Urdu with a confidence-threshold fallback for low-confidence responses.

Miniso-Inspired E-Commerce Website

MERN Stack

Tech stack: React (Vite), Node.js, Express, MongoDB, React Router

- Developed a full-stack e-commerce website inspired by Miniso using React (Vite), Node.js, Express, and MongoDB.
- Built a fully responsive interface with product sections, carousels, and dynamic category displays.
- Implemented core e-commerce functionality including product viewing, cart management, and user login.
- Added smooth client-side navigation and route handling with React Router.

Full-Stack ERP Module

Internship Project

Tech stack: React.js, Node.js, Express, MongoDB

- Developed a custom module for ERP software during the internship at Devzz Tech Solutions, implementing dashboard interfaces, data forms, and dynamic tables for improved workflow management.
- Connected front-end components to back-end APIs to handle CRUD operations efficiently, then debugged, tested, and optimized features for real-world business use.

EDUCATION

Bachelor's in Computer Science (BSCS)

2022 – 2026

Quaid-i-Azam University - CGPA: 3.1 / 4.0 - Specialization: Web Development & AI

Intermediate in Computer Science (ICS)

2020 – 2022

IMCG PG F-7/2 - Grade A

Matriculation (Science)

2018 – 2020

Islamabad Model School for Girls G-9/3 - Grade A1
